PROFESSIONAL SUMMARY

- Over all 5+ years of experience relevant to IT 3 years and remaining into other technology.
- 3+ Years of Experience in SQL Database Administration and Maintaining of very large and complex databases in SQL Server 2008,2012.
- Power bi developing techniques and its tools.
- Expertise in Database Administration servers with server configuration performance tuning and Maintenance with good trouble shooting issues.
- Experience in query tuning and stored procedures and troubleshooting performance issues.
- Python programming about one year of experience.
- Experience in scheduling,monitoring of Jobs.
- Creating and Maintaining of Maintenance Plan.
- Clear understanding of Implementation of Log Shipping, Replication and mirroring of databases between the servers.
- Create and Maintain Database mail.
- Monitor and troubleshoot database issues.
- Experts in creating indexes, Maintaining indexes and rebuilds and reorganize.
- Excellent in handling all electrical equipment along with theatrical and practical calculations.
- Excellent team player with good analytical, organizational and communication skills, attention to detail and ability to work independently.
- Excellent implementation skills, highly adaptable, commitment and urge to grow.
- Worked on multiple projects within aggressive time schedules and work diligently towards team goals.
- Experienced in interacting with Business, Development and Operational teams, and Clients .

TECHNICAL SKILLS

Defect Management Tools	MS-Office complete
Operating Systems (OS)	Windows XP,Windows Server 2008,2012
Scripting Languages	HTML, C, SQL DBA and Python, Power bi basics.
Tools	SSMS,SQL profile.
Browsers	Internet Explorer, Mozilla Firefox, Google Chrome

PROFESSIONAL EXPERIENCE

Company: Experis IT pvt ltd.,   **Oct 2022 - till date**
 Role: Data Administrator

- Worked as a data administrator for the austrilain project ALFFIE where we have build an alternate web page.

●By using Open Source page where we build from an alternate source page.

Company: Modi Properties pvt ltd.   **Feb2022 – Oct 2022**
  Role: System Administrator

● SQL Server maintenance and updating of data in the database and writing the quires and resolving the issue.

● Server based web application maintenance and its related works.

● Resolution of issues in the server and making it to be in a healthy and smooth functioning.

● Updating of data in the server and web development changes done regularly.

 Company: K.N.R.Constructions Pvt.ltd.,   **Jul 2018 –Nov2020**
  Role: Technical Administrator

● Worked on SQL Server 2012 migration from SQL Server 2008 to2012.

● Troubleshooting database mirroring issues and fixing the related alert.

● Configuring and Scheduling the backup and restore jobs in the production environment.

● Understanding the issues in SQL server and clearing the bugs and making the server work freely do that the data is stored safely.

● Troubleshoot the Database issues.

● Implementation of SQL Logins,RolesandAuthenticationModesasapartofSecurityPoliciesforvarious categories of users.

● Daily Maintenance of SQL servers included reviewing SQL error logs, Event viewer..

● Monitoring all backups, restores and maintenance jobs over production environments.

● Configuration and monitoring Replication.

● Installation of backups for servers if any power fluctuation occurs.

● Troubleshooting database issues.

● Troubleshooting log shipping , Replication &Mirroring.

● Maintaining the job Schedules and Backup and Restoration of Databases.

● Maintaining backup and Restore databases.

● Create and Maintain Database mail & Linked servers.

● Restore or remove databases by using Attach-Detach.

● Perform mirroring activity according to requirement.

● Performing import\export data from higher to lower version.

● Maintaining SQL server configuration manager.

● Performing Database migration activity.

● Installation of power backups to server in case of fluctuation's occurred (UPS).

Role: Network Assistant.
Product: Networking

● Installation of desktops and CCTV with required IP address and its maintenance is done regularly.
● These are connected to the server with the help of IP address.
● Installation and maintenance of UPS of 10KVA,6KVA and 3KVA etc., along with battery backup for
    servers and remaining desktops.

Company: B.S.N.L an Govt Organization under P.S Engineers on contract to hire basis.   Jan 2017-July2018

 Role: Electrical Engineer
Product: Electrical Equipment Maintenance

● Installation of Transformer's of high voltage and Gen sets along with its breakers and its maintenance.
● Installation of UPS of 2*100KVA for backup for pc's for department personals.
● Handling and Distribution of required load to the customer .
● Clearing of the issues in Breakdown in the transformer's of 33/11 KV ,400KV and 600KVrespectively.
● Maintenance of circuit breakers of Vacuum , SF6, and Air cooled breakers etc.,

 Company : K.N.RConstructions pvt.ltd.,   Jun 2015– Nov2017
 Role: Trainee Electrical Engineer
 Project: Walayar- Vadacancherry four lane highway.

● Designing and analyzing the equipment where to be placed and assembling with the Grid to transfer the power.
● Installation of transformer's and Dg sets along the highway and its maintenance of high voltage equipment's.
● Along with these circuit breakers are also arranged to hold the load if any fluctuations arise then to trip the breaker
    immediately.

EDUCATION

● Graduate, Bachelor of Electrical and Electronics Engineering, JNTUH, India : 63%

● HSC , MPC, India : 72%

● SSC, India : 80%

CERTIFICATION

● SQL administration and management in Udemy an Online platform.

● Python programming.

● HTML an web designing platform.

● Power bi developer certification.
