Plinth Beam Check.

Notes:

- Inspection should be done before casting of plinth beam.
 Yellow enamel paint to be used for marking FFL of flooring. Mark 2' above FFL on column steel. Plinth beam top must be 2'3" (in case of pavers) or 2'4" (in case of RCC slab) below the mark.
 Prepare plinth beam Dimensions Check Plan as follows:

- Print an A3 size plan. Show outer dimensions. (Tolerance 2")
 Show length and width of plinth beams (Tolerance 1")
- Circle each correct dimension with green colour. Circle each incorrect dimension with red colour and mention actual dimension next to it.

 Project managers must make pedestal/column 0 self check report similar to report for column check. QC must collect report and attach the same to this report.

Plinth Beam Steel check.

Notes:

- Mark v for correct or minor mistake which does not require correction Mark x for minor mistake that requires minor correction.

 Mark x for major mistake that requires correction by replacement or re-fixing.

 Mark x x for major mistake that cannot be corrected.
- Columns overlapping length should be 45 to 50 D.
