Quality Control Check Repot. Stage: Before Casting Footings (Apartments)

apeciated size of covering blocks	Scrop Actual size of covering blocks being used
Remarks:	
Earth Work Cheek.	
Quality of earth work?	Good Nvg. Bad Excess carth shifted away from site? Ryes No.
Remarks:	
Footings Check,	

- Mark v for correct or minur mistake which does not require correction
- Mark X for prinor raistake that requires minor correction.

 Mark X X for prajor mistake that requires correction by replacement or re-fixing.
- Mark $\times \times \times$ for major mistake that cannot be corrected.
- Fit size should be 6" to 12"more than the footings size on all sides.

=

- Excess earth must be shifted away from footidgs area.
- PCC should be 3"more than the foating size (or as specified) and in one level, (Level tolerance 1") Depth should be more than or equal to the specified depth. Keep in mind PCC thickness & sand filling wri to road FFL
- Footing size & dupth telerance is 1". Depth of footing must be marked by paint on column steel.
- Proper pegs must be made for center*he marking on all sides in CRS or brickwork. Marking with rads is not permitted.
- If space between footings is less than 12"then a 4"hollow block wall with mortar is to be raised between the footings. Do not combine the footings.
 Covering blocks of specified thickness must be used (generally 50 mm). Tolerance '4".
- Check the specified development lengths for mat and columns.
