## Quality Control Check Repot. Stage: Before Casting Footings (Villas)

Distance of tap from furthest distance that requires curing (max permitted 100')   Distance of tap from furthers aday (enquire from labourers)   Distance of tap from furthers   Distance of tap from furthers
--

## Quality Control Check Repot. Stage: Before Casting Footings (Villas)

Specified size of covering blocks   Sp mm   Actual size of covering blocks being used   So mm
scheck.  of covering blocks  Some Actual size of covering blocks being used  Some Mode Some Some Some Some Some Some Some Som

- Mark v for correct or minor mistake which does not require correction
- Mark X for minor mistake that requires minor correction.
- Mink XX for mujor mistake that requires correction by replacement or re-fixing.
- Mark XXX for major mistake that cannot be corrected.
- Pit size should be 6" to 12"more than the footings size on all sides.
- 7 6 5 Excess earth must be shifted away from footings area.
- 9.00
- Depth should be more than or equal to the specified depth. Keep in mind PCC thickness & sand filling wrt to road FFL. PCC should be 3"more than the footing size (or as specified) and in one level. (Level tolerance 1") Footing size & depth tolerance is 1". Depth of footing must be marked by paint on column steel.
- 10. Proper pegs must be made for centerline marking on all sides in CRS or brickwork. Marking with rods is not permitted.
- 11. If space between footings is less than 12"then a 4"hollow block wall with mortar is to be raised between the footings. Do not combine the footings. 12. Covering blocks of specified thickness must be used (generally 50 mm). Tolerance 1/3"
- Check the specified development lengths for mat and columns.
