Plinth Beam Check.

Notes:

- Inspection should be done before casting of plinth beam.

 Yellow enamel paint to be used for marking FFL of flooring. Mark 2° above FFL on column steel. Plinth beam top must be 2°5° (in case of pavers) or 2°4° (in case of RCC slab) below the mark. Prepare plinth beam Dimensions Check Plan as follows:

 a. Show outer dimensions. (Tolerance 2°)

 b. Show length and width of plinth beams (Tolerance 1°)

 c. Print an A3 size plan.
- Circle each correct dimension with green colour. Circle each incorrect dimension with red celour and mention actual dimension next to it.

 Project managers must make pedestal/column 0 self check report similar to report for column check. QC must collect report and attach the same to this report.

Death Steel Check.

Notes:

- Mark or correct or minor mistake which does not require correction Mark for minor mistake that requires minor correction.

 Mark for major mistake that requires correction by replacement or re-fixing.

 Mark for major mistake that cannot be corrected.
- Columns overlapping length should be 45 to 50 D.
