Plinth Beam Check.

- Inspection should be done before casting of plinth beam
 Yellow ename; paint to be used for marking FEL of flooring. Mark 2' above FEL on column steel. Plinth beam top must be 2.3" (in case of pavers) or 2.4. (in case of RCC slab) below the mark.
 Prepare plinth beam. Dimensions Check Plan as follows
 a. Show outer dimensions. (Tolerance 2")
 b. Show length and width of plinth beams (Tolerance 1")
 c. Prot an A3 size plan.
- Ordic citch conset dimension with green colour. Citch each incorrect amension with red colour and mention actual dimension next to it.

 Proper is most read make read-ear-polarit. Citch each incorrect amension with red colour and mention actual dimension next to it.

Plinth Beam Steel check. Notes:

- Mark V for correct or minor mistake which does not require correction
 Mark X for minor mistake that requires minor correction.
 Mark XX for major mistake that requires correction by replacement or re-fixing.
 Mark XXX for major mistake that cannot be corrected.
 Columns overlapping length should be 45 to 50 D.
