Quality Control Check Repot.

Plinth Beam Check.

- Inspection should be done before casting of plintn beam Yellow enamel paint to be used for marking FFL of flooring Mark 2° above FFL on column steel. Plinth beam top must be 2'3" (in case of pavers) or 2'4" (in case of RCC slab) below the mark. Prepare plinth beam Dimensions Cheel Plan as follows:
- Show outer dimensions (Tolerance 2")
 Show length and width of plinth beams (Tolerance 1")
- Print an A3 size plan
- Circle each correct dimension with green volour. Circle each incorrect dimension with reductions and mention actual dimension next to it.

 Project managers must make pedestal/column 0 self check report similar to report for column check. QC must collect report and attach the same to this report.

Plinth Beam Steel check.

Notes:

- Mark v for correct or minor mistake which does not require correction
 Mark x for minor mistake that requires minor correction.
 Mark x for major mistake that requires correction by replacement or re-fixing.
 Mark x x for major mistake that cannot be corrected.
- Columns overlapping length should be 45 to 50 D.
