Quality Control Check Repot.

Stage: Before Casting Plinth Beam (Villas)

## Plinth Beam Check

- Inspection should be done before easting of plinth beam.
  Yellow enamel paint to be used for marking FFL of flooring. Mark 2' above FFL or column steel. Plinth beam top must be 2'3" (in case of pavers) or 2'4" (in case of RCC slab) below the mark
- Prepare plinth beam Dimensions Check Plan as follows
- Show length and width of plinth beams (Tolerance 1") Show outer dimensions, (Tolerance 2")
- Print an A3 size plan
- J. 2 Circle each correct dimension with green colour. Circle-each meoriest dimension with red colour and mendion octual dimension next to it
- Project managers must make pedestal/column 0 self check report similar to report for column check. QC must collect report and attach the same to this report

## Quality Control Check Repot. Stage: Before Casting Plinth Beam (Villas)

Remarks:	Pedestal/column0 – self check report attached?	Column steel overlapping and cranking? (overlapping length should be 45 to 50 D)	Level marking at 2' above FFL is made?	Brackets for elevation features provided?	Alignment of beams on outer side?	Quality of Bracing Provided?	Have rods for staircase slab been provided?	Quality of centering, rod bending and concreting?	Quality of centering, rod bending and concreting.

## Plinth Beam Steel check.

Notes:

- 1. Mark for correct or minor mistake which does not require correction
- Mark X for minor mistake that requires minor correction.

  Mark XX for major mistake that requires correction by replacement or re-fixing.

  Mark XXX for major mistake that cannot be corrected.
- Columns overlapping length should be 45 to 50 D.
