Quality Control Check Repot.

Plinth Beam Check.

Notes:

- Inspection should be done before casting of plinth beam.
 Yellow enamel point to be used for marking FFL of flooring. Mark 2° above FFL on column steel. Plinth beam top must be 2°3° (in case of pavers) or 2°4° (in case of RCC slab) below the mark. Prepare plinth beam. Dimensions Check Plan as follows:
- Show outer dimensions (Tolerance 2")
 Show length and width of plinth beams (Tolerance 1")
 Print an A3 size plan
- Circle each correct dimension with green colour. Circle each incorrect dimension with red colour and mention actual dimension next to it.

 Project managers must make pedestal column 0 self check report similar to report for column check. QC must collect report and attach the same to this report.

Plinth Beam Dimensions Check Plan enclosed?
Yes No

CYes □ No	Pedestal/column0 – self check report attached?
Correct Needs correction	Column steel overlapping and cranking? (overlapping length should be 45 to 50 D)
Yes No	Level marking at 2' above FFL is made?
Yes No Lina	Brackets for elevation features provided?
Good Avg. Bad	Alignment of beams on outer side?
Good Avg. Bad	Quality of Bracing Provided?
Yes No	Have rods for staircase slab been provided?
Good Avg. Bad	Quality of centering, rod bending and concreting?
	Onality of centering, rod bending and concreting.

Plinth Beam Steel check.

Notes:

- Mark for correct or minor mistake which does not require correction.

 Mark × for minor mistake that requires minor correction.

 Mark × for major mistake that requires correction by replacement or re-living.

 Mark × × for major mistake that cannot be corrected.

 Columns overlapping length should be 45 to 50 D.
