Plinth Beam Check.

Notes:

- Inspection should be done before casting of plinth beam
 Yellow enamel paint to be used for marking FFL of theoring. Mark 2" above FFL on column steel. Plinth beam top must be 2.3" (in case of pavers) or 2.4" (in case of RCC slab) below the mark a Show outer dimensions. (Tolerance 2")
 b. Show length and width of plinth beams (Tolerance 1")

- Circle each correct dimension with green colour. Circle each incorrect dimension with red colour and mention actual dimension next to it.

 Project managers must make pedestal/column 0 self check report similar to report for column check. QC must collect report and attach the same to this report.

Plinth Beam Dimensions Check Plan enclosed?	
☐Yes ☐ No	The state of the s

Quality Control Check Repot. Stage: Before Casting Plinth Beam (Villas)

- 8	 200	- 10							<u> </u>			
			Remarks:	Pedestal/column0 – self check report attached?	Column steel overlapping and cranking? (overlapping length should be 45 to 50 D)	Level marking at 2' above FFL is made?	Brackets for elevation features provided?	Alignment of beams on outer side?	Quality of Bracing Provided?	Have rods for staircase slab been provided?	Quality of centering, rod bending and concreting?	Quality of centering, rod bending and concreting.
				Yes No	Correct Needs correction	□Yes □No	☐ Yes ☐ No ☐ NA	☐ Good ☑ Avg. ☐ Bad	Good Avg. Bad	☑ Yes ☐ No	Good Avg. Bad	

Plinth Beam Steel check.

Notes:

- 1. Mark for correct or minor mistake which does not require correction
- Mark X for minor mistake that requires minor correction.
- Mark XX for major mistake that requires correction by replacement or re-fixing. Mark XXX for major mistake that cannot be corrected.
- Columns overlapping length should be 45 to 50 D.
