Inspection should be done after:

- Brickwork, CRS for compound wall, compound wall and gate pillars are completed
- chicken mesh fixed
- after cleaning the bungalow.
- external scaffolding tied
- external brickwork & beam joints filling completed.
- electrical conducting work is completed (except bathrooms).

- Mark for correct or minor mistake which does not require correction
- Mark imes for minor mistake that requires minor correction.
- Mark XX for major mistake that requires correction by replacement or re-fixing
- Mark XXX for major mistake that cannot be corrected.
- Wall thickness should be as per plan. Use of 4" and 6" blocks must be checked
- All walls should have 2 beds of about 2"to 3"thickmess with one no. 6 mm or 8 mm rod with M15 CC
- Chicken mesh should be used in each and every joint between RCC & Brickwork.
- Joint between brickwork & beam on external side must be filled.
- Check room dimensions with working plan. (Tolerance: 1")
- Diagonals of each room shall be equal. (Tolerance: 2")
- Balcony sill level should be 3'3"from SFL. (Tolerance: 1")
- Check plumb of walls where ever it appears to be out of plumb. (Tolerance: 1/2") Check room height with specified height. (Tolerance: 1")
- Specify the No. of beams which are not aligned by more than 1"in a room.
- Door frames must have black Japan coating and wood primer / pellambar at cost of painter.
- Setbacks must be leveled atleast 6" below FFL of setbacks to ensure plastering is 6" below FFL
- Mark a line 2ft above FFL on the building, compound wall and road face of compound wall. Affix 2 screws.

Door Frames & Windows check

Notes:

- Mark \vee for correct or minor mistake which does not require correction
- Mark X for minor mistake that requires minor correction.
- Mark XX for major mistake that requires correction by replacement or re-fixing.
- Mark XXX for major mistake that cannot be corrected.
- Window template depth should be between 2 to 2 ½ after plastering. Lentil level should be 7'3" from SFL & 7' from FFL. (Tolerance 1")
- Lofts should be at a height of 7'to 7'3" from FFL. Kitchen plat from should be at a height of 32" or 33" from FFL and 32" or 33" from SFL. (Tolerance 1")
- Slopes of lofts and kitchen platforms to be checked by using 12"spirit level and check height from floor from 2 or 3 points.
- Provide single layer table brick at bottom of each door frame without threshold. Thickness of platforms & lofts should be between 2 & 2.5".
