Earth Work Check.			
Quality of earth work?	☐ Good [VAvg. ☐ Bad	☐ Good [YAvg. ☐ Bad Excess earth shifted away from site?	√Yes □ No
Remarks:			

Footings Check,

votes.

- . Mark

 ✓ for correct or minor mistake which does not require correction
- Mark X for minor mistake that requires minor correction.
- Mark XX for major mistake that requires correction by replacement or re-fixing.
- 4 Mark XXX for major mixtake that cunnot be corrected.
- Pit wize whould be 6" to 12" more than the footings size on all sides.
- 6. Excess earth must be shifted away from Jodings mea.
- Depth should be more than or equal to the specified depth. Keep in mind PCC thickness & sand filling wrt to road FFL.
- 8 PCC should be 3"more than the footing size (or as specified) and in one level. (Level tolerance 1")
-). Footing size & depth tolerance is 1". Depth of footing must be marked by paint on column steel.
- Proper pegs must be made for centerline marking on all sides in CRS or brickwork. Marking with rods is not permitted.
- If space between footings is less than 12"then a 4"hollow block wall with mortar is to be raised between the footings. Do not combine the footings.
- 12. Covering blocks of specified thickness must be used (generally 50 mm). Tolerance 1/2".
- Check the specified development lengths for mut and columns.
