### Plinth Beam Check.

Notes:

- Inspection should be done before casting of plinth beam.

  Yellow enamel paint to be used for marking FFL of flooring, Mark 2' above FFL on column steel. Plinth beam top must be 2'3" (in case of pavers) or 2'4" (in case of RCC slab) below the mark. Prepare plinth beam Dimensions Check Plan as follows:

  a. Show outer dimensions. (Tolerance 2")

  b. Show length and width of plinth beams (Tolerance 1")

  c. Print an A3 size plan.
- Plinth Beam Dimensions Check Plan enclosed? マYes No

Circle each correct dimension with green colour. Circle each incorrect dimension with red colour and mention actual dimension next to it.

## Quality Control Check Repot. Stage: Before Casting Plinth Beam (Villas)

 r					- 2					
		Remarks:	Column steel overlapping and cranking? (overlapping length should be 45 to 50 D)	Level marking at 2' above FFL is made?	Brackets for elevation features provided?	Alignment of beams on outer side?	Quality of Bracing Provided?	Have rods for staircase slab been provided?	Quality of centering, rod bending and concreting?	Quanty of centering, rod bending and concreting.

### Plinth Beam Steel check. Notes:

- Mark v for correct or minor mistake which does not require correction
   Mark X for minor mistake that requires minor correction.
   Mark X for major mistake that requires correction by replacement or re-fixing.
   Mark X X for major mistake that cannot be corrected.
   Columns overlapping length should be 45 to 50 D.
