The Director of Industries
Government of Andhra Pradesh
Chirag Ali Lane
Hyderabad-500 001

Kind Attn:
Shri J. Veeraswamy
Jt. Director of Industries/SSI

Sir,

M/s. Central India Engineering Co. 25-A Azamabad Indl. Area, Hyderabad-500020 has been engaged in the manufacture of hand pumps apart from manufacturing bright bar shaftings also. The unit was enlisted under the Government Purchase Programme with the National Small Industries Corporation, Madras in 1975 vide enlistment No. NSIC (M)/GP/Reg. Southern Region/AND/75 dt. 21-8-1975. They have the necessary facilities even before the period mentioned above.

As on 6.8.75
llw
11/7/80
Keeping in view the past performance and capacity of the equipment, the unit has been assessed for 80 MT per month on single shift basis. This was, however, done in view of the demand from the State undertakings in the country who have been regularly placing orders on the above unit for Bright Bar Plunger Rods and to get the facilities extended to registered small scale units.

At present the unit is facing acute scarcity of raw material to draw the Bright Bar. It is, therefore, to request you to kindly consider the unit to be "under the compact industry" so that it will facilitate the unit to get the raw material directly from the main producers. You are further requested to recommend the unit to The Iron & Steel Controller, Hindustan Steels and M/s. Tata giving the capacity as 80 MT p.m. on single shift basis for Bright Bars.

Your action may kindly be intimated to this office.

Yours faithfully,

(K. G. Karayanan)
Director
