Sub: Removal of panel protective wrappers. ( job no L-Q2725)

Dear sir,

We have fixed the car body, landing doors, car doors & frames for the above lift at your site and safety sticker are intact. In this regards we are in need to remove panel protective wrappers before handing over.

If the panel protective wrappers are not removed immediately then the quality of panels & the final finish will not be up to the mark. Wrappers gum in the protective wrappers may leave stain marks in the panel if we try to remove the same in latter stage.

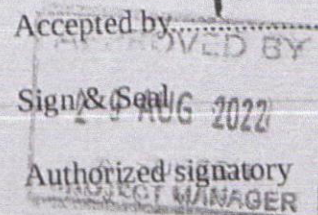

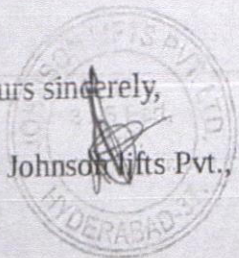

Also the wrappers will get addhered to the pannels due to heat in the environment and it will become impossible to remove the wrappers. In this case for removing the addhered wrappers additional process is involved to remove the wrappers which can be done on chergeable basis.

In addition, After handing over of the lift for your usage, JLPL will not be responsbile for any scratches or dents in any of the lift panels.

Thanking you & assuring you of our best services at all times.

Yours sincerely,

Subject : ARD Maintenance and General instructions.

Dear sir,

We would like to inform you that the above lift is installed with ARD (Automatic Rescue Device) unit. If the 3 Phase power supply goes OFF, this ARD unit will operate the lift to nearest floor with the help of battery incorporated in the system. In this regard we have to maintain these Batteries fully charged condition.

Here we advice/suggestion to keep lift main power supply always ON condition. Please don't switch OFF the lifts main supply which is the direct source for battery charging. If the main is switched OFF, the batteries charging voltage will be discharged and will lead to failure of Batteries. If the batteries fail ARD will not operate. The defected batteries should be replaced on chargeable basis.

This is for your kind information and Keep the lift Power supply always in ON condition to avoid battery discharge.

Thanks & Regards.
