SUB: Safety/Operational Instructions of Johnson Elevator for **Job no: L-P8874** installed at your premises

Dear Sir,

We would like to inform you that we have completed the installation, testing & Commissioning work of the lift at your premises **MODI REALTY MALLAPUR LLP**, and we advice you to kindly take care on the below listed points for safe and trouble free usage of lift.

1. In case the lift is used for building material shifting and labor is using the lift for transport,

- Lift cabins to be properly protected to avoid scratches and damages of the lift cabin & doors
- Proper security/lift operator to be assigned during usage of lift(s)

Any material damage is found due to missuse of labor and material shifting, will be replaced on chargeable basis only. JLPL will not be responsible for any scratches in the lift panels which may occur in future, even if the lift was kept ideal without usage.

2. Landing sills, car sills and all lift entrancess needs to be cleaned periodically to avoid accumulation of dust and other materials which may lead to malfunctioning of lift doors and other lift equipments.

3. Power supply

- 3 phase supply to be maintained between 380 volts to 415 volts and the power supply to be permanent
- Earth to neutral voltage should be less than 4 volts and greater than zero voltage at the time of lift running and ideal conditions.

Above said Improper earthing and power supply may lead to equipment failure and the same will not be covered under warranty

4. Should not use any acidic cleaning agents to clean the panels. Usage of improper agents may lead to corrosion of the lift panels and will mark a permanent stain in the lift panels. Please contact our service team to take up with cleaning processes.

5. The panel protective wrappers to be removed at the time of handing over and cleaned for gums. The gums may cause stain in the panels and may lead to rusting of panels irrespective of panel make - SS or painted. JLPL will not be responsible for any gum cleaning and rust in panels in future due to not removal of wrappers as per your request. JLPL will be cleaning the panels only on cost basis if both rust and stain happens because of not removing the wrappers at the time of handing over of the lifts.

Thanking you,

Yours faithfully,

1. Sub: Removal of panel protective wrappers. (job no – L-P8874)

Dear sir,

We have fixed the car body, landing doors, car doors & frames for the above lift at your site and safety sticker are intact. In this regards we are in need to remove panel protective wrappers before handing over.

If the panel protective wrappers are not removed immediately then the quality of panels & the final finish will not be up to the mark. Wrappers gum in the protective wrappers may leave stain marks in the panel if we try to remove the same in latter stage.

Also the wrappers will get addhered to the pannels due to heat in the environment and it will become impossible to remove the wrappers. In this case for removing the addhered wrappers additional process is involved to remove the wrappers which can be done on chergeable basis.

In addition, After handing over of the lift for your usage, JLPL will not be responsible for any scratches or dents in any of the lift panels.

Thanking you & assuring you of our best services at all times.

Yours sincerely,

for Johnson lifts Pvt., ltd

ARD Maintenance and General instructions

LIFT No. L-P8874
MODI REALTY MALLAPUR LLP
SY NO 19, GULMOHAR RESIDENCY
MALLAPUR
NEAR NFC
MALLAPUR
HYDERABAD
500076

Subject : ARD Maintenance and General instructions.

Dear sir,

We would like to inform you that the above lift is installed with ARD (Automatic Rescue Device) unit. If the 3 Phase power supply goes OFF, this ARD unit will operate the lift to nearest floor with the help of battery incorporated in the system. In this regard we have to maintain these Batteries fully charged condition.

Here we advice/suggestion to keep lift main power supply always ON condition. Please don't switch OFF the lifts main supply which is the direct source for battery charging. If the main is switched OFF, the batteries charging voltage will be discharged and will lead to failure of Batteries. If the batteries fail ARD will not operate. The defected batteries should be replaced on chargeable basis. This is for your kind information and Keep the lift Power supply always in ON condition to avoid battery discharge.

Thank & Regards.

You are now the owner of _____ "JOHNSON" Lifts. We are listing below some of the "Do's and DON'Ts" for using the Lift efficiently and to avoid frequent breakdowns and consequent inconveniences. Before informing us about the break-down, please check the following.

- a) Check for Power Supply -
If not power supply, please call Electricity Board.
 - b) Check if all three phase Power Supply are available :
If not, Please call Electricity Board.
 - c) Check the incoming main fuses -
If they are blown out, Please rewrite it or call Electricity Board.
 - d) Check whether all the landing gates and lift gates are closed properly
If not, close it.
 - e) Please check whether all the three phases are in sequence
If not, call Electricity Board.
 - f) Please check whether the MPCB is in "ON" Position -
If not, switch it on.
 - g) Please check if any phase linking is there
If so, call Electricity Board.
 - h) If your Lift is not running even after all the above check Ups, Please get in touch with our service Department on Phone No. 26152003, 26152004, 26152005, 26152006.
- DO's and DON'Ts**
1. Please keep your Machine Room under lock and key.
 2. Please identify "JOHNSON LIFTS" Service Personnel before allowing them to attend to your lift.
 3. Please do not allow unidentified persons to attend or check your lift.
 4. Please put the lift lights "ON" Permanently.
 5. Do not load the Lift beyond the rated load.
 6. Do not put your hands through the gates when the Lift is on the landing or away from it.
 7. Do not put your hands through the gates when the Lift is on the landing or away from it.
 8. Do not allow water to enter into the lift well and to the machine room.
 9. Do not touch the Lift parts without switching off the Power Supply.
 10. Do not tamper with any of the Controller Circuits.

For relieving the Passengers trapped inside the Lift, the following steps may be observed :

- 1) If the Lift has stopped in between floors, Normally a large portion would be visible from one of the landings. Select that landing for carrying out rescue operations.
- 2) Insert the Door Open Key in the provision provided above the Push Box, Push the Door Open Key and Open the door lock. The door will open freely without any obstruction. If any obstruction is observed, reinsert the key a little deeper till the lock releases and gate open freely.
- 3) Help the Passengers to come out of the Lift. See that he does not slip into the Lift Shaft. If any stool is provided for stepping on, please hold it firmly so as to prevent it from slipping into Lift Shaft.

"CAUTION"

The Rescue Operation should only be carried out by responsible members. Please do not allow children to carry out the rescue operations.

If you are trapped in a Lift, please do not panic. Nothing will happen. Please press the ALARM BELL or should for help. Do not press any of the buttons unnecessarily while the rescue operation is on. If you have any difficulty in operation, or you require any guidance regarding the proper usage of the Lift please feel free to contact us at the above address so that we may be in a position to depute our personnel with a prior appointment to explain the various procedures.

You are entitled for periodical Free Service of the Lift both preventive and Corrective maintenance for a period of One Year. Our personnel will be coming periodically to carry out the maintenance of your Lift. After expiry of One Year Guarantee period, we offer Two types of Services.

- 1) Comprehensive Servicing and Maintenance Plan.
- 2) Routine Servicing and Maintenance Plan.

However, we will be getting in touch with you in this regard before the expiry of the warranty period.
