SUB: Safety/Operational Instructions of Johnson Elevator for Job no: L-R8426 installed at your premises.

Dear Sir,

We would like to inform you that we have completed the installation, testing & Commissioning work of the lift at your premises MODI REALTY MALLAPUR LLP, and we advice you to kindly take care on the below listed points for safe and trouble free usage of lift.

1. In case the lift is used for building material shifting and labor is using the lift for transport,

- Lift cabins to be properly protected to avoid scratches and damages of the lift cabin & doors
- Proper security/lift operator to be assigned during usage of lift(s)

Any material damage is found due to missuse of labor and material shifting, will be replaced on chargeable basis only. JLPL will not be responsible for any scratches in the lift panels which may occur in future, even if the lift was kept ideal without usage.

2. Landing sills, car sills and all lift entrances needs to be cleaned periodically to avoid accumulation of dust and other materials which may lead to malfunctioning of lift doors and other lift equipments.

3. Power supply

- 3 phase supply to be maintained between 380 volts to 415 volts and the power supply to be permanent
- Earth to neutral voltage should be less than 4 volts and greater than zero voltage at the time of lift running and ideal conditions.

Above said Improper earthing and power supply may lead to equipment failure and the same will not be covered under warranty

4. Should not use any acidic cleaning agents to clean the panels. Usage of improper agents may lead to corrosion of the lift panels and will mark a permanent stain in the lift panels. Please contact our service team to take up with cleaning processes.

5. The panel protective wrappers to be removed at the time of handing over and cleaned for gums. The gums may cause stain in the panels and may lead to rusting of panels irrespective of panel make - SS or painted. JLPL will not be responsible for any gum cleaning and rust in panels in future due to not removal of wrappers as per your request. JLPL will be cleaning the panels only on cost basis if both rust and stain happens because of not removing the wrappers at the time of handing over of the lifts.

Thanking you

Yours faithfully,

HYDERABAD
500076

Date:

1. Sub: Removal of panel protective wrappers. (job no – L-R8426)

Dear sir,

We have fixed the car body, landing doors, car doors & frames for the above lift at your site and safety sticker are intact. In this regards we are in need to remove panel protective wrappers before handing over.

If the panel protective wrappers are not removed immediately then the quality of panels & the final finish will not be up to the mark. Wrappers gum in the protective wrappers may leave stain marks in the panel if we try to remove the same in latter stage.

Also the wrappers will get addhered to the pannels due to heat in the environment and it will become impossible to remove the wrappers. In this case for removing the addhered wrappers additional process is involved to remove the wrappers which can be done on chergeable basis.

In addition, After handing over of the lift for your usage, JLPL will not be responsible for any scratches or dents in any of the lift panels.

Thanking you & assuring you of our best services at all times.

Yours sincerely,
for Johnson Lifts Pvt. Ltd

ARD Maintenance and General instructions

LIFT NO. L-R8426
MODI REALTY MALLAPUR LLP
'H' BLOCK,
GULMOHAR RESIDENCY,
MALLAPUR
HYDERABAD
500076

Subject : ARD Maintenance and General instructions.

Dear sir,

We would like to inform you that the above lift is installed with ARD (Automatic Rescue Device) unit. If the 3 Phase power supply goes OFF, this ARD unit will operate the lift to nearest floor with the help of battery incorporated in the system. In this regard we have to maintain these Batteries fully charged condition.

Here we advice/suggestion to keep lift main power supply always ON condition. Please don't switch OFF the lifts main supply which is the direct score for battery charging. If the main is switched OFF, the batteries charging voltage will be discharged and will lead to failure of Batries. If the batterys failes ARD will not operate. The defected batteries should be replaced on chargeable basis. This is for your kind information and Keep the lift Power supply always in ON condition to avoide battry discharge.

Thanks & Regards,
