Weight for the purpose of invoicing shall be done inclusive of weight storage media of waste like drums, liners, bags etc. In case of high variation in weight, the weight captured at Operator weighbridge shall be considered as final.

For stored quantities, necessary advance payments by Demand Draft shall be taken after mutual discussions.

**4. TRANSPORTATION CHARGES:**

**a) Waste Transport Charges: TKM**

Transportation will be charged on TKM basis, on distance calculated both-ways (Minimum for 20 km i.e. minimum distance used for calculation is 10 Km each way).

Since the diesel rate is fluctuating frequently, the transportation charge/rate is calculated every month based on the average diesel rate during the month, using the formula given below.

Diesel rate will be as promulgated by the Govt. of India diesel price distribution policy.

|                           |                                                                                                                 |                                       |
|---------------------------|-----------------------------------------------------------------------------------------------------------------|---------------------------------------|
| a) Fixed Costs            | Includes – Depreciation on Vehicles, interest, Insurance and Road Tax.                                          | Rs. 1.90 (Actual incurred)            |
| b) Variable Costs         | All operational costs including Salaries, Cost of Maintenance of vehicles and TA&DA for the drivers and helpers | Rs. 4.51 (Actual Incurred)            |
| c) Dynamic Variable cost  | Cost of diesel and other lubricants                                                                             | Rs. 4.034 (As per actual calculation) |
| d) Profit on B&C only     | For sustenance of quality, maintenance and growth                                                               | 10% proposed works out to Rs. 0.85    |
| Total cost per Ton Per KM |                                                                                                                 | Rs. 11.30 per Ton Per KM              |

- Fixed cost will not be varied.
- 10% increase per annum on variable cost is proposed and the same will be affected, every financial year.
- Dynamic variable: varies as per the changes in the diesel rate. The formula will be  $Rs. Z(Y/X)$

Z = The last derived dynamic variable cost

X = Diesel rate prevailing at the time of last derived dynamic variable cost (prior to revision of current (latest) diesel rate)

Y = Current (latest) diesel rate

- Element “C” will be calculated based on the pickup month and the transportation rate will be fixed accordingly.
- Profit: Profit of 10% is considered only on Variable Cost and Dynamic Variable Cost. Profit is not included as Fixed Cost.

The final transportation rate will be  $a+b+c+d$ , which now works out to Rs. **10.88** per Ton per KM, with the present diesel rate of Rs. 96.32 per liter. The dynamic variable arrived as  $Z = 4.064$ ,  $X = Rs. 96.32$  and  $Y = Rs. 96.32$

#### b) Minimum Truck Load Capacity:

Minimum 90% of Container Capacity or Truck Load Capacity shall be charged for Transportation.

#### c) Waste Transport Charges: Per Trip

In case waste generation of customer is very less & for trucks with smaller capacities (Less than 5 Ton) transportation will be charged on per trip basis. The rate for same will be finalised as per quote submitted to the Generator by the Operator.

**d) Truck Detention Charges:**

Maximum time of Three hours is allowed for the truck to be detained at the Generator premises from the time of reporting at their Security Gate. In the event this period is exceeded then Rs. 500/- per hour shall be charged as detention charges unless it is mutually agreed and accepted between both parties in writing.

**e) Truck No Show Charges:**

In case after planning and scheduling of a truck for the Generator, the Generator decides not to send waste and wishes to send the empty truck to Operator, the Generator shall pay the transportation charges at actual to and fro distance as per the agreed transportation charge only.

**5. CONTAINER MAINTENANCE CHARGES:** [Optional, applicable when containerized truck Services are utilized]

The Generator has to pay the following charges as mentioned below towards the services of the Container, if opted for by the Generator.

**a) Container Maintenance Charge: The charges are: -**

- 5.0 MT Hook loaders Rs. 2,90,000/- per Container (Excluding GST)
- 15.0 MT Hook loaders Rs. 5,75,000/- per Container (Excluding GST)

**Note:** Since these containers will be replaced after three years due to wear and tear, structural disintegration and damage of the container due to corrosion, chemical inclusion etc., above container maintenance charges will be valid for three years only. The container charges are subject to the fluctuations of the steel prices in the market.

**b) Container Handling Charges:**

The GENERATOR shall pay for Container Handling Charges to Operator as follows for utilizing the Material Handling Equipment.

For Waste transported by Generator, Handling (Unloading) Charges shall be Rs. **450/-** per MT.

**6. ESCROW AMOUNT @5% OF DISPOSAL COST:**

A charge @ 5% on disposal charges (On Landfillable waste disposal) shall be applicable and levied on the actual waste quantities billed.

**7. MINIMUM MONTHLY SERVICE CHARGES:**

**Generator** has to pay a minimum monthly service charge of **Rs. 3,000/-** per month **i.e. Rs. 36,000/-** per annum. This amount shall be paid in advance for one financial year. This amount shall be adjusted against every month User Charges invoices or in a period of one financial year. In the event, for whatsoever reason, the GENERATOR is unable to utilize the facility services for a particular month/period, the GENERATOR shall forfeit the amount that is unutilized in that financial year.
