Respected MD Sir,

We need to change 4 batteries with 42AH for a 10 to 15 min duration.
EXIDE Battery lowest rating 42ah.

- 42ah x 4 batteries = 168AH
- Backup Time (in hours) = $168\text{ah} \times 12\text{v} / 2450\text{w} = 0.82$ hours
- with 24 month's warranty

Please Kindly find the below quotation for new batteries.

Another process to run temporarily with present batteries.

1. connect only two batteries of 100AH for the inverter.
- 100ah x 2 batteries = 200AH
 - Backup Time (in hours) = $200\text{ah} \times 12\text{v} / 2450\text{w} = 0.97$ hours

Regards,

V Akhil Murthy

Respected MD Sir

Today we have tested with 2 batteries each one 100ah Inverter is not working. I have spoken with sukum inverter. the inverter is programmed for 4 batteries I have sent the model number of inverter.

Compulsory we should change all four batteries with 42 ah.
Please kindly suggest us sir.

Regards,

V Akhil Murthy
