Subject: [Paramount Avenue] - Issue with Power Meter Variations

Dear Soham,

This is to bring to your kind notice that there is severe variation in the power bills charges.

As you are aware we have two meters for our common amenities going by the bill trend we have observed that load/connection on one of the meter is very high and other meter is very low.

Due to this we are seeing huge variation in Bill charges. As an example for this month one meter charges are ₹96,551/- and other is ₹ 6,346/-.

The slab rates are high due to more connections to a single meter. We request from our end to please look into this matter and assign an electrical engineer to distribute the load evenly among the two meters.

We have got a verbal warning from electricity board on this matter. As we are consuming more volts as per the designated limit. There are high chances to be fined by the department.

Require your immediate attention on this matter.

Thanks in advance!!
Best Regards,
Bhargava Banda
