**LOCKS & ARCHITECTURAL FITTINGS
AND SYSTEMS**

FOR A SAFER, SMARTER LIVING EXPERIENCE.

**ALL 5 SAFETY
STRENGTHS
EST. 1897**

Safety Strengths

Godrej provides a total locking solution, offering locks at various safety strengths to ensure optimum safety.

- **Safety Level 1 - Basic Safety**
- **Safety Level 2 - Ultra Safe Technology**
- **Safety Level 3 - Extra Safe Technology (EXS)**
- **Safety Level 4 - EVVA 3 Kurve System Technology (3KS)**
- **Safety Level 5 - Advanced Digital Access Control Technology**

Godrej Safety Strength 1 locks come with the conventional mechanical locking system through basic security systems which have levers, wafers, tumblers and single-row pin-cylinder technologies.

Godrej Safety Strength 2 locks have highly precise computerised dimple keys with Advanced multi-row pin-cylinder technology. Here, the maximum number of combinations (key differs) that can be provided is up to 100 million, which makes each key unique and non-interchangeable with any other key.

Godrej Safety Strength 3 locks come with Advanced, Angular multi-row pin-cylinder technology. The maximum number of combinations (key differs) that can be provided is up to 2 billion and a highly complex system of master key solutions is possible.

The highest safety strength, Godrej EVVA, in mechanical locks, comes with a revolutionary EVVA 3 Kurve system technology (3KS) with a floating pin, sidebars and locking bar. This conforms to European standard EN 1303. The 30 trillion combination cycle means that a single key will not repeated for the next 30 trillion keys. Since there are not 30 trillion humans on the planet, it's virtually impossible for someone else to have an identical key as yours.

Unlike conventional mechanical locks, the Godrej Digital Locks are based on virtual networks, which have four different access control systems and have unlimited combinations to ensure enhanced safety.

Locks Maintenance Tips (Do's and Don'ts)

- Do not try to open the lock with any other parts/elements other than its own key.
- Do not close the door/drawer/cabin when the bolt of the lock is extended/locked.
- Paints and varnish should not be used over the locks as it may enter the lock parts and affect the smooth functioning of the lock.
- For cleaning/ polishing of the lock do not use any chemicals.
- Do not use any lubrication oil for smooth functioning of the lock. Only use WD-40 or kerosene for the same.
- Do not apply excessive force on key while opening the lock.
- Do not use the key as a screw driver or a can-opener as it may damage the key.
- Avoid exposure of the lock to rain.
- The aesthetic part of locks such as handles should be installed after the decoration of the door/home.
- Always get done the Installation/Repair through Helpline/Authorized service provider.

Industrial Solutions

Locking Solutions for Airport

Need : Advanced security system with non-interchangeability and customized access

Solution : Customized Ultra locks with interlocking arrangement

Customer : Bangalore International Airport

www.godrejlocks.com

Locking Solutions for Notary Press

Need : High security & dual access in printing cylinders plates

Solution : Customized mechanical locks for access control and dual access

Customer : Bank Note Press - Dewas, Madhya Pradesh

www.godrejlocks.com

Locking Solutions for OEMs

Need : Customized Common Key / Master Key systems for peripherals, furniture and panels

Solution : Customized Cam locks with Master Key and Common Key system

Customer : HCL Peripherals - Chennai, Deloitte - Goa, ATIS Accounts - Pondicherry, Patane Group - Goa, MGL - Hyderabad, Bero - Delhi, Teekoo - Bangalore
