Subject: Repeated water issues in B-Block

To whom so ever concerned,

Today again we residents of B-Block faced a nasty morning due to poor maintenance in Vista Homes.

No usage water by the time the day has started. Being a prompt payer of maintenance charges, I am demanding you to explain the residents how the maintenance charges are being spent?

A basic need of usage water is not being fulfilled by the management. Is it that hard to educate a person to check time to time about the water levels and act accordingly?

This issue has become so frequent. I personally got so troubled with this issue last week during my marriage. I was so humiliated by my relatives and feeling ashamed of being in such a big community but still have to chase up every now and then for such basic needs like water.

From the month of may till today this year we might have faced similar water related issues at least 10times. I hope you could understand the condition and please take necessary steps immediately and let the residents know.

Thanks & Regards
Abhiram Bavisetty
