Subject: Re: Usage Water Issue

To,

General Secretary
Vista Homes Owners Association.

Despite of any response regarding our last email, problem has reoccured today that too in the evening time.

Expecting timely response on our emails as it is the minimum thing we expect as honest customers from management.

Vista Homes Owners

To,

General Secretary
Vista Homes Owners Association.

This is to bring to your Notice the repeated instances of "NO WATER SUPPLY" to A, B & I Blocks, This is causing severe inconvenience to the residents as the water supply from overhead tanks is the only LIFELINE to the residents to go with the day to day activities and any interruption without notice in water supply is literally causing HAVOC with the day to day planned schedules of the residents especially office going residents / school going children.

While we also understand and appreciate the efforts put in by the management on temporary alternates measures, until we have a permanent water supply solution to the society. We the residents of VISTA HOMES also as a part of our responsibility have created awareness among the residents to conserve water to the best possible way we can to contribute to the society.

We have many a times noticed that the Water Supply is resumed within 30 – 45 Min of outage, Which clearly indicates that the concerned staff which is required to monitor the supply through water tankers and in-house resources is not functioning effectively. We request to please instruct the concerned and initiate necessary corrective actions for these instances not to repeat again.

Expecting a early revert on the planned action.

Sincerely,
VistaHomes Owners
