Forward this to Mr. S. Ram Now! 29/8/11

Dear Mr. Srinivasa Rao,

Further to the personal discussions we had at your office and subsequent to that you have asked some clarifications and in this regard we would like to inform you on the same.

5 years extended warranty on Solar PCU cannot be provided but we can extend Service Warranty for 5 years and if required you can go for AMC after 2 years of the actual warranty which the product is featured.

We will work out on the subsidy part and even we can submit the application on your behalf to MNRE.

Individual break-up is not possible while availing subsidy from MNRE as per company policy.

We can try to deliver within 30 days from the date of firm PO.

We already worked out the best pricing considering the future business and definitely will try to give in future orders but will ensure 2% CD for the current order.

We will revert back on the payment terms by the end of the day.

For any clarifications on techno-commercial aspects, please do call us at 9885456333/9052223737 or reply back.

Regards,

Dear Sir,

29-Aug-11

As per the discussions had with Modi Properties, the following details are required..

1. 5 Years Extended Warranty on Solar PCU.
2. Subsidy for the following order of 2 no's of 2 KW PCU with 1400 WP system
3. Individual Breakup cost for bill of materials.
4. Delivery by 20th Sep. and installation before Dussera Festival by Oct 5th.
5. Final Pricing

Payment terms:-

1. 20% Against PO
2. 60% Against delivery made of all materials.
3. 20% After installation and Commissioning.

Plz kindly suggest

Thanks & Regards

Dear sir,

We thank you whole heartedly, for the opportunity given to us to provide solar solutions to your projects at Hyderabad. Further to the discussion we had with you on 22 aug 2011 at 3 pm, we would like send our lowest quotes as per your requirements.

Pl find attached quote for solar power system as per your requirement.

Pl go thro the commercial proposal, sl no1. Is for 1000 wp panel and with 2000 KVA solar PCU, you will get subsidy for that,

24-Aug-11

But sl no2 , you will not get subsidy. if you place order for 2 systems,
then you are eligible for a subsidy of Approx 1.02 lakh.

We assure you , good after sales service always.

Waiting for your valuable PO

With warm regards

Bettaswamy gowda

Technical And Commercial Proposal

**SOLAR STAND ALONE, BIDIRECTIONAL,
ROOF TOP SYSTEM with**

✓ 1000 Wp SOLAR PANEL,

✓ 2000 VA SOLAR POWER CONDITIONING UNIT

✓ 48V 200AH TUBULAR GEL BATTERIES

PRESENTED BY

SU-KAM POWER SYSTEMS LIMITED

SOLAR DIVISION

GURGAON, HARYANA, INDIA

1. INTRODUCTION:

** MNRE!
Ministry of
New Renewable
Energy
for subsidy.*

The proposal is prepared to give an overview of design supply, installation and commissioning of.

Solar Power backup system, With 1000wp solar module, 2000 VA solar power conditioning unit, which gives first preference to solar, second preference to battery and third preference to Electricity from grid. And 48V 200ah battery, with all other accessories.

Pay back period – with DG set less than	3 yrs
Shadow free area required on roof top	100 Sq ft.
Life of the system	25 Years
Co2 emission saved per annum	600 Kg
Power generated from the system per annum	1440 units
✓ Warrantee on Solar power conditioning unit (P.C.U.)	2 yrs - 5 yrs *
✓ Warrantee on Batteries	36 months. - 3 yrs.
✓ Warrantee on Modules - details	10+15 yrs. - Solar panel 10 yrs free replace 15 yrs for recta.
✓ Lead time to complete inst & commissioning	20-25 days
* Subsidy from MNRE	30% on invoice price

2. COMPANY PROFILE:

SU-KAM the leading Power Back-up Solution provider in India, with its consistent focus on technological innovation, has attained heights unheard of, in the largely unorganized industry. Having a clear technological edge, creating new benchmarks and upgrading standards for the industry, comes naturally to Su-Kam. Today, Su-Kam is the established leader in product innovation, design sensibility and sales distribution network.

An ISO 9001 and ISO 14001 certified company, Su-Kam - is the only power Back-up Solution provider in India, with a state-of-the-art in-house R & D facility, recognized by Government of India. Su-Kam has several state-of-the-art production facilities, systematically planned and built to modern construction standards. The plants are equipped with sophisticated assembly lines and are backed by completely integrated in-house component manufacturing facilities and R&D Centers.

Reliance India Power Fund, a joint venture sponsored by R-ADAG (Reliance Anil Dhirubhai Ambani group) and Temasek Holdings, headquartered in Singapore has invested in Su-Kam. The trust reposed in Su-Kam by two of the most powerful business groups in the world is indicative of its standing and potential.

Handwritten signature
24/8/12

All Su-Kam products have invariably received overwhelming response from the market, as it creates products which eventually enhance the quality of life for its users, while giving them real value for money. Having pioneered the field of Inverters, Online UPS Systems, Line Interactive UPS Systems and Batteries (Lead Acid and VRLA), Su-Kam today

provides an array of solar products and high capacity inverters (Standard and customized) for Industrial usage.

Su-Kam prides itself on being a customer focused organization and its products are engineered and manufactured to consistently provide reliable solutions to its customers. Having a nationwide presence through a network of branch offices and channel partners, Su-Kam ensures complete and efficient service to its customers. Continuous focus on quality

and strict adherence to international standards has enabled Su-Kam to export its products to various overseas markets across Asia, Africa, Middle East and Pacific Region. Currently, 10 % of the company's turnover is made up of exports, and this is poised to rise exponentially in the years ahead. The prestigious international certifications of CE and UL, awarded to its products to meet European, US and Canadian norms.

Handwritten signature and date:
24/01/11

3. SOLAR RADIATION AND RADIATION MAP:

The position of the sun in the sky is critical in order to ensure system design which maximizes energy output. It can be seen that majority of the time the sun is in the southerly direction, hence we should orient the PV modules to the south, so that we can utilize majority of solar radiation and achieve higher output. Based on seasons and solar position, the number of daylight hours available also varies by the month.

Sum
24/8/11

4. SINGLE LINE DIAGRAM OF THE SOLAR SYSTEM:

Fig.1 Basic Block Diagram of Solar PV Stand alone Bi-directional System.

✓ 24/9/11

5. PROPOSED LOAD DETAILS:

S.NO	Capacity of Solar inverter	Load WATTAGE	QT Y	HOURS OF Backup	Total Watt hrs Assured
1	2 KW	2 KW	1	3 -4 units per day	1440 W-Hrs/Annum.

6. ASSUMPTIONS FOR DESIGN:

The Solar Radiation Data's are based on standard books & simulation software. The Mean hourly Radiation Data between 8AM and 4PM is considered. The PV Power Plant is bidirectional solar system. Module mounting structure will be mounted on top of the terrace.

7. BILL OF MATERIALS FOR 2 KW SOLAR HYBRID

BIDIRECTIONAL SYSTEMS:

S.No	Description	Unit	Quantity
1	Solar PV Array capacity 1000KWp - 250 Wp X 4 Nos.	Set	1
2	Solar PCU – 48 V 2000W	Piece	1
3	Battery 48V 200 Ah	Set	1
4	Module Mounting Structure	Set	1
5	Cables and accessories	set	1

24/8/21

8. COMMERCIAL:

Under Section 32 of Income Tax Act, profit making industrial, commercial and urban establishments can avail an accelerated depreciation of 80% on Solar Power Generating Systems and Solar PV Modules.

Additionally, incentives in the form of capital subsidy are available from the Ministry of New and Renewable Energy, Government of India as per the scheme for Abatement of Diesel Generation in Industrial Installations. These incentives are Rs 90/Wp up to a maximum of 30% of equipment cost.

The net payback period is 4 years with the capital subsidy and 10 years without it. After the completion of the payback period, the generation of power is free and all the power generated from PV becomes power saved.

SU-KAM will assist you to process the subsidy application with MNRE for this project.

for
24/8/11

9. PAY BACK PERIOD CALCULATION:

Baseline Commercial Assumptions for 1000 KWp	Parameter
Capacity of PV Installation	1000 KWp
Operating Life	25 Years
O&M & Insurance	2.00% Per annum
Diesel Price per litre.	Rs 44/-
Diesel Generation Cost/unit	Rs 16/ kWh
Inflation in Diesel Price	5%
Total Capital Cost of PV System	Rs. 2.58 Lakhs
Depreciation in 1st year at 80%	Rs. 2.30 Lakhs
Income Tax Savings at 30%	Rs. 0.69 Lakhs
Capital Subsidy at 30% of PV equipment cost	Rs. 0.77 Lakhs
Effective Capital Cost of PV System	Rs. 1.12Lakhs
Units produced per year from solar system – 4 to 5 units x 30 days x 12 months	1440 Units/Annum
Diesel, oil, maintenance and skilled technician expenses /annum	Rs.0 .29 lakh/PA 1.22 lakh/.29 lakh
Pay back	LESS THAN
Payback period from solar when compared to DG set	3.86 YRS

24/8/11

3. 100% advance payment along with confirmed purchase order.
4. Prices of the mentioned products are Valid for 30 Days.
5. Installation charges are extra if not std installation, applicable.
6. Entry tax/octroi shall be charged extra. *★ included*
7. Delivery shall be made either with ex-stock or within 4-5 Weeks after the confirmation of P.O.

QUALITY RELIABILITY SAFETY SERVICE CUSTOMER ORIENTATION

Salient Features

- High efficiency monocrystalline silicon solar cells connected in series.
- Lamination using TEDLAR, crane glass and EVA provides environmental protection.
- Solar cells laminated between UV resistant polymer (EVA) and high transmission toughened glass surface.
- Rugged weather-proof nylon terminal box for output connections.
- Anodized aluminum frame provides structural support for mounting and shock resistance.
- Manufactured to stringent quality standards and tested to withstand adverse environmental conditions.

Certifications :

- Certified & approved to the requirements of IEC 61215 standards
- Approved by Solar Energy Centre (MNES) / BSNL / TEC and RDSO
- Safety certification ('S' make) by STQC India for SPV Module upto 80 W

Applications

- Domestic lighting systems • Street Lighting • Water pumping • Battery charging • Community TV system
- Microwave repeater station • Railway signaling and lighting systems • Rural radio phones and exchanges
- Offshore platforms • Desalination Plants • Cathodic protection systems • Portable lantern
- Power pack for village electrification • Crop sprayer • Sign boards & glow signs

Technical Specifications

Model No. FS-M125-	10	40	75	100	120	165	200	240
Maximum Power (W)	10	40	75	100	120	165	200	240
Optimum Power Voltage (Vmp)	16.4	16.8	17.45	18.15	26.21	35.85	29.4	31.3
Optimum Operating Current (Imp)	0.64	2.38	4.30	4.95	4.58	4.61	6.8	7.67
Open Circuit Voltage (Voc)	21.0	21.5	20.85	22.15	32.4	43.6	35.5	37.3
Short Circuit Current (Isc)	0.8	2.60	5.00	5.25	5.19	5.15	7.9	8.39

Note :

The above specifications pertain to the standard branded SPV Module. It can also supply SPV Modules of different ratings to meet specific technical requirements.

Electrical specifications mentioned above are at standard test conditions of 100mw/sq.cm. AM 1.5 and at 25°C cell temperature and are within normal production tolerance of $\pm 10\%$.

Due to continuous process innovations, the modules supplied may differ from those specified above.

BIG TUBULAR

Live Life Non-Stop!

36*
MONTHS
WARRANTY

For Inverters, Home UPS & UPS Systems

*Conditions apply

Su-Kam

Ek nayi soch

Features:

- Unique tubular positive plates designed for longer life.
- Superior active material & Special alloy used for low maintenance of the battery.
- Plate designed with special additives to get quick recovery from deep discharge.
- Float guide vent plug for electrolyte level indication.

Advantages:

- Suitable for frequent power-cuts.
- Very low maintenance & long life.
- Eco-friendly Aqua Trap vent plugs to ensure no acid fumes.
- Quick charge acceptance.

Applications:

Vent Plug Indicator

Battery Layout

Technical Specifications

Sr. No.	Battery Type	Volts	Capacity C20	Initial Charging Current (Amps)	Maximum Overall Dimensions (mm)		
					Length	Width	Height
1	SBT 1500	12	150AH	9	503	191	410
2	SBT 1800	12	180AH	11	503	191	410

Recommended Ad-on-Product

Advanced Micro-Processor Based Equalizers to extend your battery life.

Equalizer is particularly applied in LA battery (12V / 2V systems) where two or more batteries are connected in series. When batteries of different State of Charge (SOC) are connected in series, there are chances that weaker battery becoming very weak & stronger battery being overcharged. This leads to the reduction in cycle life of the overall string of the batteries placed with respect to the original cycle life of the batteries supposed to give. Equalizer prevents this adverse effect of batteries going faulty when connected in series & thereby there is an increased optimum cyclic life of the battery string.

This technology provides perfect voltage matching of batteries during both charge & discharge. The advantages of this equalizer are longer cycle life, lower failure modes & is very simple to maintain it.

Battery Equalizer
