QUOTATION

Ref: IDS

Date 06-05-2019

TO
MODI PROPERTIES
5-4-187/3&4, IInd Floor, M.G.Road,
Secunderabad - 500003.

Dear Sir,

Sub: Quotation for Supply and installation of RFID Based Boom Barriers for one site req .

We thank you for giving us opportunity to serve your esteemed organization. We are glad to quote you for Boom Barriers for single site.

SL	DESCRIPTION	Price per Unit	QTY	Amount	GST	Total
01	Beninca Lady4 Boom Barrier - Auto Operated (IN & OUT Barriers) Electromechanical barrier for passages up to 4m, intensive use Speed, Strength and soft stop/start adjustable for an always correct use and performance	112000-00	02 Nos	224000-00	@5% 11200-00	235200-00
02	ZKteko RFID reader (IN & OUT) Long Range Reader	35000-00	02 Nos	70000-00	@18% 12600-00	82600-00
03	Zkteco controller 2 door controller	18000-00	01 No	18000-00	@18% 3240-00	21240-00
04	Installation	8000-00	01 Job	8000-00	@18% 1440-00	9440-00
Grand Total						348480-00

Terms and Conditions:

1. All civil and Electrical works into client scope with our guidance.
2. Warranty 2years from the date of installation.
3. AMC rate on P.O value - 18% for 1st Year, amount of rs.61027 /- & 26% for 2nd Year, amount of rs.88150/- and 30% for 3rd Year, amount of rs.101712/-.
4. Payment 80% Advance along with purchase order and 20% against delivery.
5. Quotation is valid for one month.
6. Products will be delivered 1-2 weeks from the date of Work Order received.

BENINCA
 TECHNOLOGY TO OPEN

ROAD BARRIERS LADY

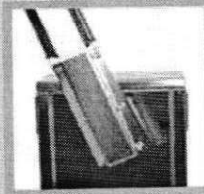

- Electromechanical barrier for passages up to 4m, intensive use
- Easy to use external manual unlock device
- Slowing down setup thanks to two adjustable limit switches
- Speed, strength and soft stop/start adjustable for an always correct use and performance
- Possibility of integrated FTC.S photocells thanks to the innovative hide-away system that enables them to be perfectly integrated with the look, ensuring maximum functionality

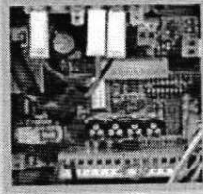

Equipped with
foundation plate

Easy to use external
unlock device

Stainless steel version
available

New control panel with all
the standard features and
pull-out terminals

LADY ——— DA.24V

BENINCA
TECHNOLOGY TO OPEN
MADE IN ITALY

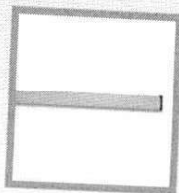

24 Vdc | intensive use

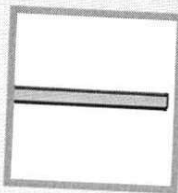

- Electromechanical 24 Vdc right barrier for intensive use. The barrier can be easily converted to left operation
- Manual release with external activation
- Optional built-in FTC.S photocells thanks to the innovative hide-away system that allows for their perfect integration
- 2 adjustable mechanical stops
- Optional battery powered operation
- Amperometric sensor obstacle detection system to prevent crushing
- Three adjustable limit switches for the braking phases and the closure position
- Stainless steel version LADY.I available
- Simple, quick and reliable rod balancing system
- Foundation plate accessory with VE.PS coach screws

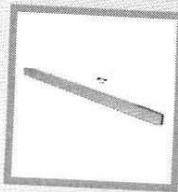

VE.PS

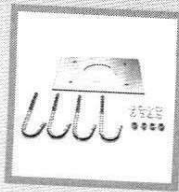

LADY.A
9081001
4.2 m aluminium arm
with caps included
(4200x60x38mm).
Available in two pieces
needs the joint (LADY.GT).

LADY.P
9081002
4.2 m white painted
aluminium arm. Caps are
included. Provided with red
rubber profiles.

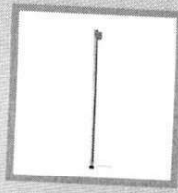

LADY.GT
9424001
Aluminium joint for LADY.A.

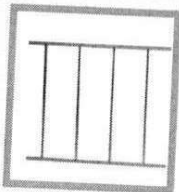

VE.PS
9623068
Foundation plate with coach
screws for LADY.

VE.TERM
9864010
Thermostat for very cold
places.

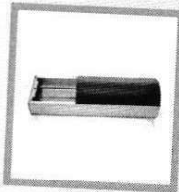

VE.AM
9078020
Mobile support for bars.

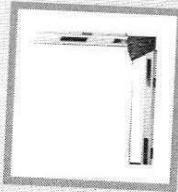

VE.RAST
9672010
Aluminium rack L= 2 m.
H= 60 cm

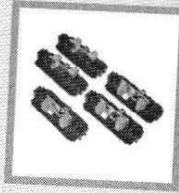

VE.AF
9078010
VE.AFI
9078015
Painted/ Stainless steel
fixed support for bars.

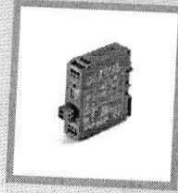

LADY.COL
9230001
Support for the installation
of a second pair of
photocell.

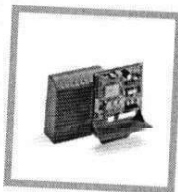

LADY.SN
9780001
Articulated joint set for
LADY.A / LADY.P (rubber
profiles must be removed).
It compromises the use of
any other accessory.

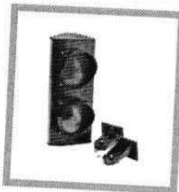

LADY.L
9534001
Flashing light set for
LADY.P.

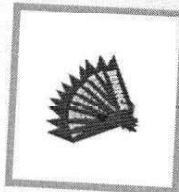

VE.KM1HN
9614267
VE.KM2HN
9614268
Single/two-channel loop
detector.

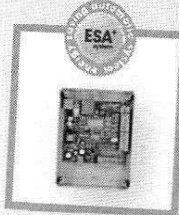

VE.CS
9760050
Traffic-light control unit
for LED.TL.

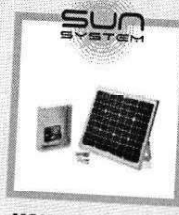

LED.TL
9766003
2 light 230 Vac LED
traffic light.

VE.CAT500
9549020
Set of 20 adhesive refractor
strips for LADY.A / LADY.P.

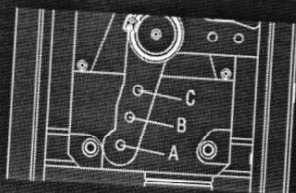

ESA BASIC
9176108
System that reduces
the electrical energy
consumption. In the
LADY model, the use of
ESA BASIC is not compatible
with the battery operation.

KSUN
9611004
KIT for system operation
via solar panel.
For 24 Vdc models.

Security at Fingertips

➔ BG100 : Automated Parking Barrier Gate

Maximum length of Boom : 6m

Boom Rest Stand : Yes

Arm material : Aluminium

Time for Up/down : 6s

Input control signal : Dry contact

Ingress protection Degree : IP54

Input Interface for : 1. Photocell

2. Air switch

3. Loop detector

Output interface : lamp

Optional Interface : Access control panel, Stand alone access control, Control button

Remote control : Yes, upto 25 meters

Mode : Automatic/Manual

Incorporated control panel with 3 push buttons

push buttons (STOP/UP/Down) to control the motor

Bumping bounce back : Optional

Auto closing time : 1-80s

Power Supply :

SMPS - Input : AC 220V / 110V, 50Hz / 60Hz
Motor power : 90W, 220V, 50Hz

Motor power : 90W, 220V AC

Dimension(mm) : 268 X 348 X 1050

operating temperature : -20°C to $+50^{\circ}\text{C}$

About us:

We from Celestial Business Solutions, based out of Hyderabad is pioneer in implementation of Security systems in the industries. As on date Celestial Business Solutions has implemented the security systems in Defence organizations, State Government, IT& ITES Segment, Manufacturing industries Health Care Industry, Educational Institutions & Pharma Companies in Telangana, Andhra Pradesh, Karnataka ,New Delhi. Due to vast experience in understanding of the security Products customization, Integration & Implementation apart from we are also into consulting services.

Products & Services offering:

The products of Celestial are made on industry standards complying with highest standards of quality. Our range of products covers:

1. CCTV cameras, IP cameras & Thermal Cameras
2. RFID scanners
3. Time and Attendance capture
4. Video Management Systems
5. Access Control Systems
6. Turnstiles & Tripods
7. Video Door Phones
8. Metal Detectors

CCTV Cameras & IP Cameras:

These CCTV Cameras effectively amplify the surveillance on your home or business premises. One of the best ways to protect yourself is to get closed circuit television cameras or CCTV cameras installed in your place. These tools feed all the data to one central unit and allow you to monitor the activity on your premises.

An IP camera is a networked digital video camera that transmits data over a Fast Ethernet link. IP cameras (also called "network cameras") are most often used for IP surveillance, a digitized and networked version of closed-circuit television, offers much more sophisticated capabilities.

- Centralized IP cameras, which require a central Network Video Recorder (NVR) to handle the recording, video and alarm management.
- Decentralized IP cameras, which do not require a central Network Video Recorder (NVR), as the cameras have recording function built-in and can thus record directly to any standard storage media, such as SD cards, NAS (network attached storage) or a PC/Server.

Biometric and Access Control Systems:

Bio metric: A biometric system is a technological system that uses information about a person to identify that person. Biometric systems rely on specific data about unique biological traits in order to work effectively. A biometric system will involve running data through algorithms for a particular result, usually related to a positive identification of a user or other individual.

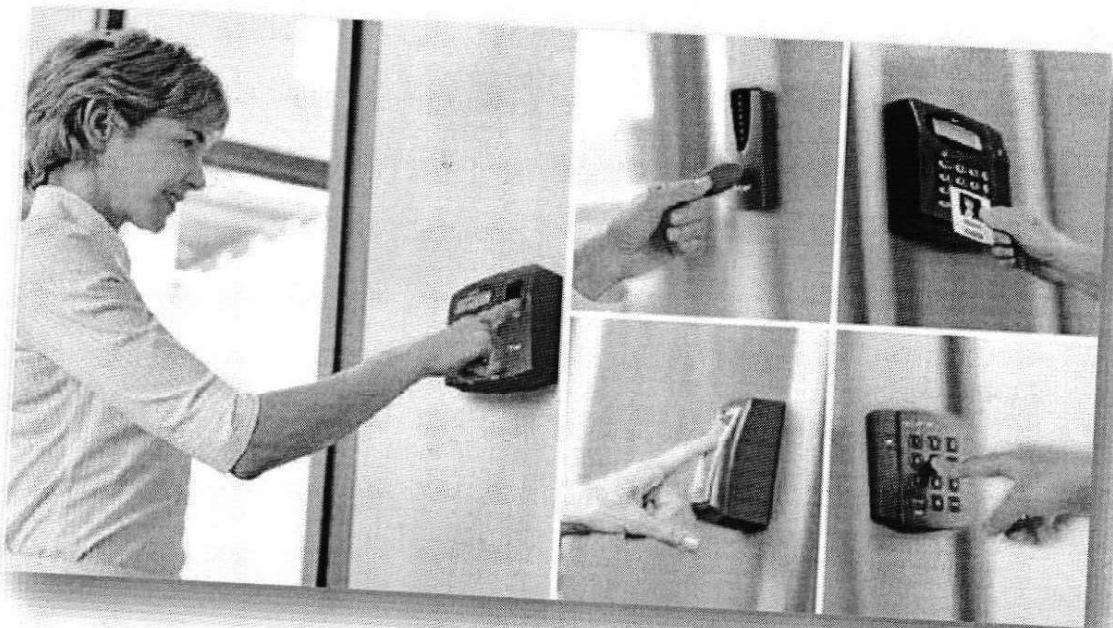

Types of Biometric devices

Finger print, face recognition and card base attendance system

Finger print, face recognition and card base for access control.

Door controllers are an up-to-date and totally flexible range of controllers, offering high reliability, security and cost effective design solutions for any access control point.

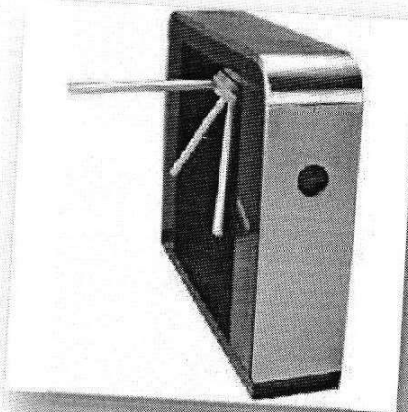

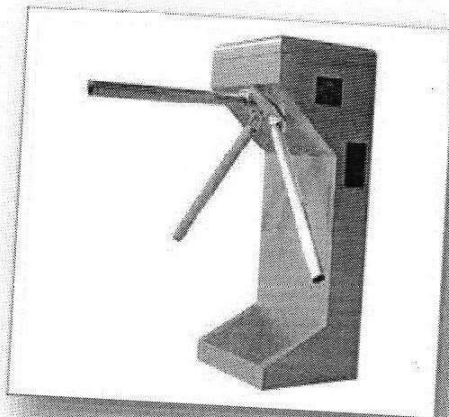

Door controllers offering support for 2, 4, 8 door controllers and these can be expanded upto 16 doors through 2, 4 or 8 door satellite controllers.

Tripod Turnstile:

The **Tripod Turnstile** is a Cutting Edge solution that provides a combination of **reliable mechanical** as well as **electronic** restriction for **unauthorized Entrants**. A **Time and Attendance Reader** can be integrated for Employee attendance programs.

The advantages of using a Turnstile compared to a conventional Gate include the better utilization of manpower, increased reliability and improved security. This mechanism allows a single employee to enter into the premises only after verification through the Access Control Module that is integrated onto the Turnstile.

The cost effective Fastlane Classic Entrance Control range is made up of tripod turnstiles and passgates for disabled access. The architecturally inspired enclosures make minimal impact on the building design and have the flexibility of custom finished tops to help blend into the building fabric.

Video Door Phones-Home Security:

If you would like to know who's at your door even before you open it, video door phones are your ultimate security solution. Widely used in homes, apartments and businesses, they have proven themselves to be reliable and crime resistant. Switch to a more secured way of living with an assured safety solution. It doubles up as an intercom system allowing you to communicate from different rooms. Now that's convenience personified in real sense.

Fire Alarm and Fire Extinguishers:

A **fire alarm system** is number of devices working together to detect and alert people through visual and audio appliances when smoke/ fire is present. These alarms may be activated from smoke detectors, and heat detectors. They may also be activated via Manual fire alarm activation devices such as manual call points or pull stations.

The most common types of alarms that businesses use are **conventional and addressable alarm systems**.

Both types of alarm link devices (such as call points and smoke detectors) to a main control panel. The main difference between the two is that with addressable fire alarm systems, you can pinpoint exactly which device has been activated.

How do addressable and conventional alarms differ?

Every device connected to the addressable system has its own unique address. When a fire is detected, the device's address shows up on the main control panel, telling you exactly which device has been activated. This will enable you to find the exact location of a fire and extinguish them quickly.

With a conventional system, there is no way of pinpointing the exact location of the fire. However, by wiring your building into different zones, you can get a general idea of where the fire is. For instance, if you have two floors, you could wire the first as 'zone 1' and the second as zone 2. So if a fire occurs in zone 1, you know that the fire is somewhere on the first floor.

Door Frame & Hand Held Metal Detectors:

Door Frame Metal Detector walk-through metal detector which uses advanced magnetic technology to accurately pinpoint the location, size, and number of concealed weapons, such as knives and guns. Personal artifacts such as coins, keys or belt buckles will not set off the alarm. It offers superior performance for demanding high security applications.

Door Frame Metal Detector walk-through metal detector can be used in the factory, prison, court, exhibition hall, stadium and entertainment lieu, where the prohibited articles need to be checked for safety.

A Hand Held **metal detector** is an electronic instrument which detects the presence of metal nearby. Metal detectors are useful for finding metal inclusions hidden within objects, or metal objects buried underground. They often consist of a handheld unit with a sensor probe which can be swept over the ground or other objects. If the sensor comes near a piece of metal this is indicated by a changing tone in earphones, or a needle moving on an indicator. Usually the device gives some indication of distance; the closer the metal is, the higher the tone in the earphone or the higher the needle goes. Another common type are stationary "walk through" metal detectors used for security screening at access points in prisons, courthouses, and airports to detect concealed metal weapons on a person's body.

Clarification on Boom barrier for PMR II

Prabhakar P <prabhakar@modiproperties.com>
To: Soham Modi
Cc: Murthy Purchase, Pmr.
May 21 at 12:26 PM

Soham Sir,

This is for your clarification on Boom barrier for PMR II, as per sirish we need two barriers for in and out.

1. Boom barriers 2 nos.
2. UHF Reader: is a sensor when the vehicle comes its will automatically opens, we need 2 nos for 2 barriers,
3. Access controller: it is must to work the UHF Reader it will work as a controller for UHF Readers, we need 2 nos for 2 barriers,
4. RFID Card or Tag enroller: we need 1, for both barriers.
5. Photo cell sensors: When barrier getting down some one suddenly enter its will stop and goes up, with out damaging the person, we need 2 for 2 barriers.

I am attaching his quote also for your clarification kindly look in to it.

Regards,

P Prabhakar

Subject: Clarification on Boom barrier for PMR II

28-05-2019

Soham Sir,

This is for your clarification on Boom barrier for PMR II, as per sirish we need two barriers for in and out.

1. Boom barriers 2 nos.
2. UHF Reader: is a sensor when the vehicle comes its will automatically opens, we need 2 nos for 2 barriers,
3. Access controller: it is must to work the UHF Reader it will work as a controller for UHF Readers, we need 2 nos for 2 barriers,
4. RFID Card or Tag enroller: we need 1, for both barriers.
5. Photo cell sensors: When barrier getting down some one suddenly enter its will stop and goes up, with out damaging the person, we need 2 for 2 barriers.

I am attaching his quote also for your clarification kindly look in to it.

Regards,

P Prabhakar
