To,

Respected MD. Sir,

This is to inform you that, on day before yesterday in NE site from 64 to 72 villas is having power problem we called electrician from SOBOA. He rectified the problem that gland is melting after checking from transformer to feeder box. Due to 70SQMM wire was soaked in water so its getting burns slowly & frequently its tripping off.

Later on 8:00PM night suddenly in front of main gate LT line pole is getting some noise and inside of main meter is burnt. I reached to site and called to Department person he rectified the error.

photographs are also enclosed .

Regards,

M . Mahesh Kumar
