

Subject: SOP for stocking material at MHTR.

Keywords: MHTR, SKU, Centralised purchase, SLLP, stock

1. Material purchase has been centralized through Modi Housing Pvt. Ltd., - Trading Account (MHTR). This is a revised SOP.
2. All materials required for construction except for material which is heavy or cannot be stored or is customized or directly installed by vendor at site is being stored at MHTR. Aggregates, cement, RMC, lifts, cement blocks, bricks, generators, panels, chillers, etc., are not being stocked at MHTR.
3. We have about 4000 SKUs (stock keeping unit). The unique identity for each SKU is a 4 + 4 alpha numeric code.
 - a. 4 character category code (Eg.: TLWL for tiles – wall tiles)
 - b. 4 digit numerical code – this is unique to each SKU (Eg. 3344)
 - c. Category (Eg.: tiles)
 - d. Sub-category (Eg.: wall tiles).
 - e. Description/specification (Eg.: ceramic)
 - f. Brand/code (Eg.: Nitco -Malaysian brown DK)
 - g. Size (Eg.: 250x375mm – hereinafter all sizes are in mm)
 - h. Units for rates (Eg.: Sqm – hereafter all areas are in Sq mtrs).
 - i. Example of SKU: TLWL3344-Tiles-Wall Tiles-Ceramic-Malaysian Brown DK-250x375mm-sqm.
4. Smartsheet has been made for making new SKUs.
5. It is important that the splitting of SKUs i.e., one SKU of each type of item is not too fine grained. Some items may be rarely used and such items should be ordered by a broadly defined SKU (Eg.:DOOR6170-doors-doorframe with threshold – WPC-Misc-Nos) so that large no. of items are ordered with the same SKU. The details of each item canbe specified in additional specifications. At the same time SKUs should not be too course grained. Eg.: Panel doors – 3 sizes which are regularly used should have 3 separate SKUs. This helps in data mining.
6. Not all items are being stocked at MHTR. Only some items which are regularly used at being stocked at MHTR. An excel sheet should be prepared for each category and sub-category of items as per standard format provided. The details of categories and sub-categories are as under:
