Subject: Reg: Arresting of Water Seepage in Upper and Lower Basements of BNC Estates.

Respected Soham Sir,

This mail is regarding Arresting of Water Seepage in Upper and Lower Basements of BNC Estates.

Sir, seepage from TOT-LOT 2,3 in to upper basements of D,F Blocks is totally arrested hence there is no seepage in upper basement, excepting the curing water splashing in to upper cellar because of curing of E-3,4,5,6 flats Slab and Brick work.

Seepage in Lowe cellar is because of the water coming from the Retaining wall and flooring joint at 2 locations of about 30' length each.

seepage is also at Squash Court area because of the brick work in the retaining wall of Squash Court.

We will build the R.C.C retaining wall in the above brick work area once the ground water lowers.

This is for your kind information sir.

Regards,
S.V.Subba Reddy,
BNC Estates.
