With an eye for beauty and a continuous quest for perfection, we ensure that only those tiles, which match our highest standards, are given the NITCO brand label.

Our in-vogue designs and advanced technological processes derive from the very birthplace of ceramic tile making: Italy and Spain.

What sets us apart is that we have always invested in the best available technology and machinery. Our high-tech NITCO plant has enabled us to become India's first tile company to offer international standards in the manufacturing of tiles.

Hence we are always on the search for environmental-friendly and pollution-free manufacturing processes and materials to contribute to the planet-preservation.

We have proof that we are getting closer by the day to anticipating future trends and impacts to accomplish our obligations and guarantee sustainability.

THE WORLD OF NITCO

It all started with a belief, and a purpose - a belief that there's no such feat which cannot be achieved, and a purpose to deliver the world's best products and services. 6 decades later, we're one of the largest, and the only premium tile brand in India. And we're only getting started.

NITCO is the only company in the country to boast a state-of-the-art, fully-integrated, automated plant, with benchmark processing systems and the most advanced technology. We are also the only company with an automated sorting process. This ensures quality consistency with the least variations. Our plant houses the country's most advanced Lab, with skilled technicians, professionals and experts from across the globe, ensuring quality and standards par excellence.

But most importantly, our processes, systems and technology also offer one more extended feature - peace of mind. In an industry where minor defects and imperfections are a norm, we strive to offer quite the opposite. With NITCO you are assured minimum risk, and the best quality, at all times. A definitive proof of that comes in the goodwill we've created amidst the Architect and Dealer fraternity across India.
